

### *Selection*

After exclusion of duplicates, a total of 1,377 articles were found. A selection was made using title and/or abstract; this resulted in 329 articles that matched our clinical question. Full texts were evaluated and scored (A, B, C, D, or no score). The remaining A and B articles were used for tables and graphics in this book.

A (good article) when

- Baseline characteristics are clear
- Cumulative rate of skin cancer is present

B (sufficient article) when

- Baseline characteristics are clear
- Cumulative rate is unclear, but incidence rate or relative risk is given

C (doubtful article) when

- Only the number of patients with skin cancer is given
- No statistical analysis are used

D (insufficient article) when

- It does not match our clinical question

No score

- Paper not relevant at all

**NA: A copy of the article was not available to us.**
